* The Import duties upon Corn were reduced in 1849 to a uniform rate of 1*s.* per quarter, but, owing to the fluctuating character of the former duties, no estimate could be made of the effect upon the Revenue of this or previous alterations of the Corn duties.

† Estimate when in full operation. The estimate for the first year was £500,000.

For Abstract of Total Alterations from 1840 to 1854, see p. 11.

AMOUNT of TAXES REPEALED or REDUCED, and IMPOSED—*Continued.*

Note.—This Return, first made in 1849, includes Channel Islands Vessels, but not those of the British Plantations.

The Home Trade signifies on the Coasts of the United Kingdom, or to Ports between the limits of the River Elbe and Brest.

The Foreign Trade signifies to Ports beyond such limits.

No Foreign-going Vessel is included which has not been so reported within four years, and no Home Trade Vessel which has not been reported within one year. It is possible that some Vessels may be included which have ceased to exist or are no longer employed as British Vessels, but every endeavour is made to ascertain and strike off such Vessels.

With respect to the Crews, a very small deduction ought to be made for the case of men who join a fresh ship immediately on their discharge from the former one, which happens to remain in Port.

No. 29.—Quantities of the several Articles Charged with Duties of Excise in the United Kingdom; Exported; and Retained for Home Consumption, so far as relates to Articles subject to Duty in the Year 1869.

Years ended 31st Dec.	Charged with Duty.*			Exported on Drawback, or Free of Duty.		Retained for Home Consumption.

* The Excise Duty upon Chicory was not imposed before 1860.

† Including the Estimated Quantity used in Beer exported.

‡ The quantities of British spirits here stated include the spirits shipped to Foreign countries as merchandise, and also the spirits taken for Ships' Stores, &c.

Note.—In the year 1848 the Drawback of the Excise Duty was allowed on English made spirits when exported.

No. 30.—Quantities of Sugar used in Brewing, and of Sugar and Molasses used in Distilling, in the United Kingdom.

Years ended 31st December.	Sugar used in Brewing.	Sugar used in Distilling.	Molasses used in Distilling.

STATISTICAL ABSTRACT.

PUBLIC REVENUE, EXPENDITURE, &c.

No. 1.—Total Amount of the Estimated and Actual Public Revenue and Expenditure of the United Kingdom, with the difference between the Estimated and Actual Amounts, and the Surplus or Deficiency of Income.

(In this Table, in accordance with the system upon which the *Budget* Estimates have been framed, the figures for the Revenue and Expenditure show the *Net* amounts up to the year ended 31st March 1856, and the *Gross* amounts after that period.)

Years ended	Revenue. Estimated in the Budgets.	Revenue. Receipts at the Exchequer.	Revenue. More (+) or less (−) than Budget.	Revenue. Proportion of Receipts per Head of Population of United Kingdom.	Expenditure. Estimated in the Budgets (including Votes as per Appropriation Act).	Expenditure. Payments out of the Exchequer (excluding Fortifications. *Vide* p. 7).	Expenditure. More (+) or less (−) than Budget.	Expenditure. Proportion of Payments per Head of Population of United Kingdom.	Surplus (+) or Deficiency (−) of Income (excluding Fortifications. *Vide* p. 7).

* Proportion of Gross Amounts per head of population, calculated upon Totals in Tables Nos. 2. and 3.
† 1859–60.—Including £858,057 for operations in China.
‡ 1865–66.—Including £764,829 for war in New Zealand.
§ Including additional Income Tax, £840,000, imposed in December 1867.
‖ Including Supplemental Votes for Abyssinian Expedition (£2,000,000), and other services (£362,000).
¶ Supplemental Votes at the end of the year for Abyssinian Expedition (£3,600,000), and other services (£906,000).

No. 1*a*.—Local Taxation.

The Total Amount annually raised by Local Taxation to provide for Expenditure connected with the Relief of the Poor, County and Borough Police, Roads and Bridges, Drainage and Lighting of Towns, &c., is estimated—

	£
For England and Wales, in the year 1870 at	20,500,000
„ Scotland „	2,000,000
„ Ireland „	2,500,000
Making a total for the United Kingdom of	£25,000,000

which is in the proportion of 16*s*. per head of the population of the United Kingdom.

If the Amounts raised for Public and Local purposes be added together, the Total Taxation of the United Kingdom in the year ended 31st March 1870, would be about £100,500,000, or £3 5*s*. per head of the population.

No. 2.—Amount of the GROSS Public Revenue of the United Kingdom, charges for collection of Revenue not deducted, distinguishing the Principal Branches thereof.

(Revised, for the years 1855–1865, so as to include, in accordance with the system now adopted, all sums formerly deducted in progress to the Exchequer or otherwise not brought to account as Revenue.)

Years ended	Customs.	Excise.	Stamps.	Taxes.	Property and Income Tax. (For Rate in the £ see Note *.)	Post Office.	Crown Lands. (Net Receipts.)	Miscellaneous.			Total Gross Revenue.	Years ended
								Naval and Military Extra Receipts; Army Contributions from India; and War Indemnities.	Surplus Fees, Extra Receipts Civil Departments, Unclaimed Dividends, &c.	Total of Miscellaneous.

Note.—This Return includes Channel Islands Vessels, but not those of the British Plantations.

The Home Trade signifies on the Coasts of the United Kingdom, or to Ports between the limits of the River E and Brest.

The Foreign Trade signifies to Ports beyond such limits.

No Foreign-going Vessel is included which has not been so reported within four years, and no Home Trade Vessel wh has not been reported within one year. It is possible that some Vessels may be included which have ceased to ex or are no longer employed as British Vessels, but every endeavour is made to ascertain and strike off such Vessels.

With respect to the Crews, a very small deduction ought to be made for the case of men who join a fresh ship immediat on their discharge from the former one, which happens to remain in Port.

No. 41.—Quantities of the several Articles Charged (in 1869) with Duties of Excise in the United Kingdom; Free of Duty; Exported; and Retained for Home Consumption.

Years ended 31st Dec.	Charged with Duty.				Free of Duty.†

Pigs	2,477,619	2,966,979	2,308,539	1,930,452	1,497,274	1,233,893

* In these years Flax was returned in Great Britain with the unenumerated Green Crops.

† The number of Live Stock in Great Britain was returned upon 5th March in 1866, and consequently the number of sheep did not include many lambs born in that year.

‡ The differences between the Acreage in 1868 and 1869 under "Fallow," "Clover, &c.," and "Permanent Pasture," are greatly owing to the more correct classification of land in 1869.

SHEEP, and PIGS, in GREAT BRITAIN and IRELAND upon 25th of June in each year.

Note.—The decrease in the Number of Persons committed for Trial in England and Wales, since 1855, is partly to be attributed to the operation of the Criminal Justice Act of 1855, which authorizes Justices to pass sentences for short periods, with the consent of the prisoners, instead of committing for Trial to the Sessions.

* For Scotland the number of persons convicted is exclusive of those *outlawed*.

	1869	2,143,610	256,390	2,400,000	702,716	126,605	829,321	1,782,465	779,040	2,561,505	4,628,791	1,162,035	5,790,826	1,249,174	7,040,000	Distribution of Grants.

N.B.—It is to be observed that the foregoing figures relate rather to grants and amounts sanctioned for expenditure than to actual expenditure incurred, and which differences no doubt, on each head of service, or in each Province, may be very considerable; but as such differences tend to compensate each other, when collected together in an aggregate form, it may therefore fairly be presumed that the grants represent the actual outlay.

No. 50.—Expenditure by Government on account of Public Works in Each Presidency or Province of British India, for each Year; not including State outlay on Guaranteed Works.

Years ended	Bengal.	North-West Provinces.	Oude.	Punjab.	Central Provinces.	Nagpore.	British Burmah.	Straits Settlements.	Hyderabad.	Rajpootana.	Central India.	Coorg.	Mysore.	Madras.	Bombay.	Total.	Amounts expended, but cannot be shown separate for each Province.

No. 14.—Number of Horses, Cattle, Sheep, and Pigs, compared with the same in the United Kingdom - - - - 76

TO THE RIGHT HONOURABLE THE LORDS OF THE COMMITTEE OF PRIVY COUNCIL FOR TRADE.

My Lords,

I have the honour to submit to your Lordships the Agricultural Returns of Great Britain for the year 1870.

The usual Summary of the principal results of the Returns was published in the London newspapers at as early a date as in previous years, the 21st of September last, but I regret that it has not been practicable to complete and publish the general details of the Returns as soon as upon former occasions. I trust that the causes of this delay will not again retard the publication of the Returns. A new apportionment of the country into districts for the collection of the Returns by the Officers of Inland Revenue led to discrepancies between the Returns for some counties in 1870 as compared with 1869, which necessitated several references to the local officers for inquiry and explanation. The requirement of new heads of information to add to the usefulness of the Returns also increased the references to the local officers after the first receipt of the Returns.

Publication of Summary of Returns.

Later publication this year of details of Returns.

There is, however, one obstacle to the more prompt collection and publication of facts illustrative of the agricultural condition of the country, which I am sorry again to have to notice, and that is the prevalence of opposition to the Returns upon the part of Owners and Occupiers of Land in some parts of England. It is only in parts of England that difficulty is experienced in obtaining by voluntary returns such simple but important national statistics as the Acreage of Crops and the Number of Live Stock. In Wales and Scotland the Agricultural Returns are most willingly given, and it is believed with much accuracy. If the Occupiers of Land in England who still oppose the Returns could be prevailed upon to follow the example of Agriculturists in Wales and Scotland, the information contained in the Returns could be made public at a much earlier period than is now practicable.

Owners and Occupiers of Land in parts of England still opposed to Returns.

Returns willingly given in Wales and Scotland.

Total number of Returns obtained in 1870.

The total number of Returns obtained in Great Britain in 1870 was 529,150, which is less by 11,676 than the number for 1869, but in excess of the number for 1868. In the Report upon the Returns for 1869 it was explained that the increase in the number of Returns for that year as compared with 1868 "was chiefly "caused by information having been obtained from a larger "number of Occupiers of small Holdings." The decrease in the number for 1870 as compared with 1869, which may be said to have occurred altogether in England, is chiefly due to a greater number of Occupiers of more than one Farm having made one Return for all their Farms, instead of separate Returns for each Farm as requested in the heading of the collecting forms. With so large a number of Farms in England (nearly 400,000), and the large number of Inland Revenue Officers necessarily employed to collect the Returns, it is very difficult to ensure exact uniformity in the mode of making and collecting the Returns, but it is believed that the experience gained each year tends to render the Returns upon the whole more accurate and more reliable.

Holdings classed according to Acreage occupied. (*See* Table, p. 20.)

A classification of the Holdings in Great Britain, according to their Acreage, has been made by the collecting officers this year for the first time, and the Table that has been prepared to show the number and per-centage of each class of Holding in each county will be examined with interest. In England, out of a total of 393,569 Holdings, 213,626, or 54 per cent., do not exceed 20 acres; in Wales the total is 55,978, of which 27,185, or 48 per cent., do not exceed 20 acres; and in Scotland the total Holdings number 79,603, including 45,434, or 57 per cent., not exceeding 20 acres.

As regards the size of Holdings in the several counties, as shown by this Table, the highest proportion of Holdings not exceeding 20 acres in English counties is in the West Riding of York, where it reaches 64 per cent., and the lowest is 35 per cent. in Cumberland and Westmoreland. The highest per-centage of Holdings between 20 and 100 acres, is 48 per cent. in Westmoreland (it is as high as 43 per cent. in Cumberland), and the lowest is 19 per cent. in Wilts. Of Holdings above 100 acres, the per-centage is as high as 35 per cent. in Northumberland, and as low as 7 per cent. in Lancaster.

In Wales the per-centage of Holdings not exceeding 20 acres, is as high as 68 per cent. in Flint, and as low as 24 per cent. in Brecon; of Holdings between 20 and 100 acres, Brecon shows 60

per cent. and Flint only 24 per cent.; of Holdings above 100 acres, Radnor contains 21 per cent., and Merioneth and Flint only 8 per cent.

In Scotland the acreage of agricultural land forms but a small portion of the total area in the hilly counties, and the Holdings of cultivated land are there of a very small size. Of the total Holdings included in the returns for Sutherlandshire, 95 per cent. do not exceed 20 acres. The county with the smallest proportion of Holdings not exceeding 20 acres is Ayr, where they only amount to 27 per cent. Of Holdings between 20 and 100 acres, the highest proportion is 43 per cent. in Stirlingshire, and the lowest is 3 per cent. in Sutherlandshire; of Holdings above 100 acres, the highest proportion is 52 per cent. in Haddingtonshire, and the lowest is 2 per cent. in Sutherlandshire.

Quantity of Land occupied under each class of Holdings. (*See* Table, p. 22.)

The quantity of Land occupied under each class of Holdings was not ascertained, but an estimate has been made to show in what proportions the land under cultivation is probably divided between the small and large Holdings in Great Britain. By this estimate it appears that, although the number of Holdings of a size not exceeding 20 acres amounts to 54 per cent. of the total number of Holdings, the probable quantity of land held by that class of Occupiers is not more than 2,658,000 acres, or not quite 9 per cent. of the total acreage returned. The proportion of Holdings between 20 and 100 acres is 28 per cent., and the probable quantity of land held is 7,810,000 acres, or about 26 per cent. of the total acreage. The Holdings of a size above 100 acres are in the proportion of 18 per cent. of the total Holdings, and the quantity of land held under such Holdings is probably not less than 20,000,000 acres, in round numbers, or about 65 per cent. of the total acreage included in the Returns.

Abstract Returns of acreage for United Kingdom.

In the Abstract Returns for the United Kingdom, which are given in the first two Tables, the figures relating to Ireland have been furnished by the Registrar General for that division of the United Kingdom, and the figures for the Isle of Man and the Channel Islands have been obtained under the direction of the local authorities. The total acreage returned for the United Kingdom as under all kinds of Crops, Bare Fallow, and Grass in 1870 was 46,177,370 acres, against 46,100,153 in 1869. Of the total acreage in 1870, Great Britain had 30,407,579 acres, Ireland 15,652,578 acres, and the Islands 117,213 acres. In Great Britain the land

was divided between Tillage and Permanent Pasture in the proportion of 18,334,723 acres, or 60 per cent., for tillage, and 12,072,856 acres, or 40 per cent., for permanent pasture; in Ireland 5,661,610 acres, or 36 per cent., were under tillage, and 9,990,968 acres, or 64 per cent., were under permanent pasture; and in the Islands 95,742 acres, or 81 per cent., were under tillage, and 21,471 acres, or 19 per cent., under permanent pasture.

In 1870 the United Kingdom had a total acreage under Corn Crops (including Beans and Peas) of 11,755,053 acres, of which 9,548,041 acres were in Great Britain, 2,173,109 in Ireland, and 33,903 in the Islands. Under Green Crops (including Potatoes) the total acreage for the United Kingdom was 5,107,135 acres, of which 3,586,730 were in Great Britain, 1,498,719 in Ireland, and 21,686 in the Islands. Under Bare Fallow the total acreage for the United Kingdom was 630,294 acres, of which 610,517 acres were in Great Britain, 19,054 acres in Ireland, and 723 acres in the Islands. Under Clover and other kinds of Seed Grasses under rotation the total acreage for the United Kingdom was returned at 6,320,126 acres, of which 4,504,884 acres were returned for Great Britain, 1,775,835 for Ireland, and 39,407 acres in the Islands. The acreage under permanent pasture in 1870 in each division of the United Kingdom has already been stated comparatively with the total acreage under tillage.

Abstract Returns of acreage of Corn Crops in United Kingdom.

Of the 11,755,053 acres under Corn Crops in 1870 in the United Kingdom, 3,773,663 were under Wheat; 2,623,752 under Barley; 4,424,536 under Oats; 74,527 under Rye; 539,968 under Beans, and 318,607 under Peas. Comparing the Corn Crops of Great Britain and Ireland, it appears that of Wheat, Great Britain, inclusive of the Islands, had 3,512,749 and Ireland 260,914 acres; of Barley, Great Britain had 2,371,739 and Ireland 243,435 acres; of Oats, Great Britain had 2,763,300 and Ireland 1,648,764 acres; of Rye, Great Britain had 65,166 and Ireland 9,281 acres; of Beans, Great Britain had 530,095 and Ireland only 9,644 acres; of Peas, Great Britain had 317,198 and Ireland not more than 1,071 acres.

Abstract of acreage under Green Crops in United Kingdom.

The Green Crops, including potatoes, occupied a total Acreage in the United Kingdom of 5,107,135 acres in 1870. Potatoes were grown to the extent of 1,639,296 acres; Turnips to the extent of 2,559,629 acres; Mangold to the extent of 332,409 acres; Carrots to the extent of 19,925 acres; Cabbages, Kohl-rabi, and

Rape to the extent of 189,344 acres; and Vetches, Lucerne, and other green crops, except clover or grass, to the extent of 366,532 acres. The larger acreage under potatoes in Ireland than in Great Britain, and the larger acreage under other kinds of green crops in Great Britain than in Ireland are so well known that the figures of the relative acreage under the several kinds of green crops in Great Britain and Ireland, which will be found in the Abstract Tables, need not be more specially referred to.

Abstract of number of Live Stock in United Kingdom.

The total number of each kind of Live Stock in the United Kingdom upon the 25th of June 1870 was: Horses about 2,580,000, of which Great Britain possessed about 2,050,000 (including Horses liable to duty), and Ireland 530,000; Cattle 9,235,000, of which 5,403,000 were in Great Britain, and 3,796,000 in Ireland; Sheep 32,786,000, of which the number in Great Britain was 28,397,000, and in Ireland 4,333,000; and Pigs 3,650,000, of which Great Britain had 2,171,000 (exclusive of Pigs kept in towns and by cottagers having less than a quarter of an acre of land), and Ireland 1,459,000.

Comparison of acreage under Corn crops in 1870 and three previous years.

The quantity of land returned as apportioned to the cultivation of Corn Crops in 1870 exhibits the following variations from the three previous years. In Great Britain there were 210,000 acres less than in 1869, 115,000 acres more than in 1868, and 264,000 acres more than in 1867. In Ireland there were 35,000 acres less than in 1869, 19,000 acres less than in 1868, but 58,000 more than in 1867.

The acreage under Wheat in the United Kingdom in 1870 was less by nearly 200,000 acres than in 1869. This difference, at an average yield of 28 bushels per acre, represents a diminution in the home supply of Wheat of 700,000 quarters.

The acreage returned under Barley in 1870 was considerably larger, both in Great Britain and in Ireland, than in the previous three years. In Great Britain the acreage under Barley in 1870 was 120,000 acres more than in 1869, 220,000 acres more than in 1868, and 112,000 acres more than in 1867. In Ireland the increase has been progressive since 1867, and in 1870 there were 20,000 acres more than in 1869, 55,000 more than in 1868, and 71,000 more than in 1867.

There is much less variation in the acreage of the Oat crop than in that of Wheat or Barley. The differences in the number of acres under Oats in Great Britain in 1870 as compared with the

three previous years are not of sufficient importance for special notice, and the same remark is applicable to Ireland, where there appears to be a tendency to diminish the cultivation of Oats.

The acreage under Beans in Great Britain in 1870 shows a decrease as compared with 1869 of 45,000 acres, but it was not very different from the acreage under that crop in 1868 and 1867.

The acreage under Peas in Great Britain in 1870 was also below what it was in 1869 to the extent of 79,000 acres, but the acreage of 1870 did not differ much from that of 1868 and 1867. Both Beans and Peas are only cultivated to a very limited extent in Ireland.

Comparison of acreage under Green Crops in 1870 and three previous years.

The acreage of land under all kinds of Green Crops (including Potatoes) in Great Britain in 1870 varied but little from what it was in 1869, there being an increase in 1870 of not quite 12,000 acres. The acreage of such Crops in 1870 was, however, in excess of the acreage in 1868 by 200,000 acres, and of the acreage in 1867 by 88,000 acres. The total acreage under Green Crops in Ireland shows an increase in each year from 1867 to 1870. In the latter year there was an increase of 30,000 acres over 1869, of 42,000 acres over 1868, and of 66,000 acres over 1867.

There was a very trifling difference between the acreage under Potatoes both in Great Britain and Ireland in 1870 as compared with 1869; but the number of acres under that useful crop in Great Britain in 1870 exceeded the number in 1868 by 46,000 acres, and the number in 1867 by 95,000 acres, showing a very considerable extension of the planting of potatoes in a period of four years. The acreage of the potatoe crop in Ireland in 1870 was about 9,000 acres more than in 1868, and 42,000 acres more than in 1867.

Turnips and Swedes, although, perhaps, unfortunately on account of the very unfavourable season, were sown in Great Britain to a larger extent in 1870 than in 1869 by 39,000 acres, and the acreage under those roots in 1870 was also above what it had been in 1868 and 1867. In Ireland there were 18,000 more acres of turnips in 1870 than in 1869, and the acreage of 1870 was greater than that of 1868 and 1867. The cultivation of Mangolds in Great Britain continues to increase; there were in 1870 14,000 acres more than in 1869, 57,000 more than in 1868, and 48,000 more than in 1867. In Ireland also, although but a small acreage is as yet devoted to this valuable crop, there was a marked increase

in 1870. The crops of Cabbage, Kohl-Rabi, and Rape, in Great Britain, varied but little in acreage in 1870 from 1869, but, as shown in the detailed Tables, Kohl-Rabi advanced from 13,000 acres in 1868 to 24,000 acres in 1870. Vetches, Lucerne, and other Green Crops, except clover and seed grasses, show for Great Britain a decrease of 43,000 acres in 1870 as compared with 1869; the falling off was chiefly in Vetches. Beetroot, which is now attracting attention in this country for the manufacture of Sugar and Spirit, is returned under the last mentioned class of Green Crops, and, although but a small acreage is occupied by this root, there has been an increase from 1,429 acres in 1868 to 4,332 acres in 1870. The exact acreage under Sugar Beet is, however, not known.

Comparison of acreage under Flax in 1870 and previous years.

An increased cultivation of Flax in Great Britain has been advocated in recent years and agriculturists are acting upon the recommendation, the acreage under the crop having advanced from 17,543 acres in 1868 to 23,957 acres in 1870. In Great Britain, Flax is almost exclusively grown in England, and the cultivation of it increased in 1870, principally in the counties of Cambridge, Lincoln, Norfolk, Somerset, and Suffolk. Flax is a more important crop in Ireland than in England, but the Irish Returns for 1870 show a decrease under Flax of 34,000 acres.

Comparison of acreage under Hops in 1870 and previous years.

The cultivation of Hops did not recover in 1870 the depression experienced in 1869, the acreage under the crop in Great Britain in 1870 being rather lower even than it was in 1869. The acreage returned under Hops in England has been considered by some high authorities upon the subject to be below the extent actually planted, but the collecting officers see no reason to doubt the general accuracy of the returns.

Comparison of acreage under Bare Fallow in 1870 and previous years.

The extent of land returned under Bare Fallow in 1870, as compared with 1869, exhibits a decrease of 128,000 acres, of which a large portion was no doubt placed under crop, but some part of the diminution is owing to more correct classification of land as Bare Fallow, especially in the counties of Cornwall and Devon.

Comparison of acreage under Clover, &c. in 1870 and previous years.

The difference in the acreage returned under Clover and other grasses under rotation in 1670, as compared with 1869, requires to be noticed. As many as 1,056,000 additional acres were returned as under rotation grasses in 1870 in Great Britain. The acreage under these grasses is much influenced by the character of the seasons, and there was a variation of 510,000 acres in the

quantity of land sown with them in the years 1869 and 1868. But, allowing for a much larger breadth of Clover in 1870 than in 1869, a considerable part of the addition to the acreage under this head in 1870, must be attributed partly to the transfer to the heading of grass under rotation, of land returned in previous years as permanent pasture; and partly to the returning of land only sown with Clover in 1870. With respect to the first of these causes, it may be explained that, previously to 1870, the heading in the collecting forms was worded "Clover under Rotation," but as it was reported that some farmers returned under that head land under grass for one season only, and land under grass for more than one season as permanent pasture, the wording was altered to "Clover under Rotation for one or more seasons." The effect of this alteration in causing a transfer of land from one class of grass land to another is observable in the decrease in the acreage returned under permanent pasture in 1870. As regards the increase of the acreage of Clover by including seed lands, this is to be accounted for by the dividing, in 1870, of the columns for grass under rotation and for permanent pasture, in order to ascertain the acreage "For Hay" and "Not for Hay." Several of the collecting officers have expressed an opinion that the division of the heading for Clover, &c. was misunderstood by some farmers, who included the land sown with clover seed and corn in 1870 both under Barley or some other corn and also under Clover "Not for Hay." Subject to these remarks upon the returns of the acreage of Clover in 1870, it will be interesting to notice the acreage returned in Great Britain "For Hay" and "Not for Hay." Of the grasses under rotation in England, 1,525,271 acres were "For Hay" and 1,241,506 acres were "Not for Hay;" in Wales, 205,346 acres were "For Hay" and 192,936 acres were "Not for Hay;" and in Scotland, 338,616 acres were "For Hay" and 1,001,209 acres were "Not for Hay." Thus the total for Great Britain was 2,069,233 acres "For Hay" and 2,435,651 acres "Not for Hay." From these figures an estimate may be formed of the extent and value of the Hay crop from the sown or artificial grasses, and, at an estimated average of one ton per acre, about 2,070,000 tons of this kind of Hay must be harvested in Great Britain, of the value of 8,280,000*l.*, at an average price of 4*l.* per ton.

Estimate of Clover, &c. Hay Crop.

Comparison of acreage under Permanent

The acreage under Permanent Pasture in Great Britain exhibits a decrease in 1870, as compared with 1869, of 663,000 acres.

Although the reduction under this head in 1870 occurs in almost every county, the detailed Tables show that the largest decrease is in the grass districts. This diminution of permanent pasture helps to bear out the probability of the alteration in the heading for grass under rotation in 1870 having led to the return of a good deal of grass land as under rotation which in previous years, from being kept in Pasture for more than one season, was returned as Permanent Pasture. The division of the acreage under Permanent Pasture in 1870, in order to show what quantity was "For Hay" and what "Not for Hay" is of much agricultural interest. England was returned as having of Permanent Pasture (exclusive of mountain land) in 1870, 2,647,448 acres "For Hay" and 7,032,763 acres "Not for Hay;" Wales, 319,835 acres "For Hay" and 1,107,814 acres "Not for Hay;" and Scotland 99,868 acres "For Hay" and 865,128 acres "Not for Hay;" the total for Great Britain being 3,067,151 acres "For Hay," and 9,005,705 "Not for Hay." Here again are new data for estimating the probable produce of a very important Crop. At an average yield of 18 Cwts. of Hay per acre, for the whole of Great Britain, there would be an aggregate produce of 2,760,000 tons of what may be called Meadow Hay, which, at an average price for ordinary years of 3*l.* per ton, would amount in value to 8,280,000*l.* Altogether, therefore, the Hay Crop, both Clover and Meadow, in Great Britain, from a total acreage of 5,136,000 acres, may be estimated at about 4,830,000 tons, of the total value of about 16,560,000*l.* This estimated amount will form a guide to one branch of the pecuniary loss that a season of unusual drought, such as that of 1870, may entail directly upon Agriculturists, and indirectly upon the general community.

Pasture in 1870 and previous years.

Estimate of Meadow Hay Crop, and of Value of Total Hay Crop.

As regards the comparative number of the different kinds of Live Stock returned in 1870, and in previous years, no comparison can be made in respect of Horses, as they were not returned according to the same plan in the two years. In 1869, all kinds of Horses belonging to Occupiers of land were returned, and an estimate was made of the total number in towns; but in 1870 it was considered that the total number of Horses in Great Britain could be ascertained by means of the Agricultural Returns and the Licences issued for Horses, if the returns were confined to the number of Horses exempt from duty. Accordingly only the number of Horses used solely for Agriculture and by Market Gar-

Comparison of the number of Live Stock in 1870 and previous years.

deners, and the number of Unbroken Horses, and the number of Mares kept only for breeding, were specified in the Forms for the Agricultural Returns of Great Britain in 1870.

The total number of Horses returned under these headings in 1870, amounted in England to 977,707; in Wales to 116,131; and in Scotland to 172,871; making a general total for Great Britain of 1,266,709. Of this total, 965,515 were Horses used solely for Agriculture and by Market Gardeners, and 301,194 were Unbroken Horses, and Mares kept for breeding, the latter amounting to 38,141. The total number of Licences issued for Horses in the year 1870, was for England and Wales 770,306; for Scotland 70,902, making a total of 841,208 for the whole of Great Britain. Thus the Agricultural Returns and the Licences issued show a total of 2,107,709 Horses; but as some Horses used partly in Agriculture and liable to duty, may have been included both in the Agricultural Returns and in the number of Licences, and as two or more Licences may have been taken for the same Horse, upon changes of ownership, some deduction must be made from the total number just stated. The total number of Horses in Great Britain may probably be taken at 2,050,000. The number of Horses returned in Ireland in 1870 was 531,306, which makes a total for the United Kingdom of 2,581,306 Horses.

The total number of Cattle returned in the United Kingdom was greater in 1870 by 157,000 than in 1869; by 152,000 than in 1868; and by 504,000 than in 1867. In Great Britain the number of Cattle returned in 1870 was 90,000 above 1869, 21,000 above 1868, and 410,000 above 1867. In Ireland in 1870, 69,000 more Cattle were returned than in 1869, 176,000 more than in 1868, and 94,000 more than in 1867.

With respect to the losses of Cattle from disease in 1870, Dr. Alexander Williams, the Secretary to the Veterinary Department of the Privy Council Office, has informed me that Cattle Plague itself has not occurred in Great Britain during the year, and that the returns of other diseases, as at present received, are not sufficiently accurate to be depended upon, but that he hopes eventually to make them so. There can be no doubt that the collection of trustworthy statistics of the annual losses of Cattle from disease, as well as of the existing stock of Cattle in the country, deserves to be promoted by all classes of agriculturists.

The extreme dryness of the weather and consequent shortness of food for Sheep, naturally led to the return of a smaller number of that kind of Live Stock in 1870 as compared with previous years. The total number of Sheep returned for the United Kingdom in 1870 was less by 1,464,000 than in 1869, by 2,821,000 than in 1868, and by 1,031,000 than in 1867. The decrease of Sheep in Great Britain in 1870 as compared with the three previous years was 1,141,000, 2,314,000, and 522,000 respectively. In Ireland the number of Sheep in 1870 was less by 314,000 than in 1869, by 488,000 than in 1868, and by 492,000 than in 1867.

The number of Pigs in the United Kingdom in 1870 shows an increase upon the reduced Stock of the two previous years, but it was below the number returned in 1867. In the United Kingdom in 1870 there was an increase in the number of Pigs of 622,000 over 1869, and of 461,000 over 1868, but there was a decrease of 571,000 in comparison with 1867. In Great Britain the Stock of Pigs in 1870 was larger than in 1869, but it was smaller than in 1868 and 1867. In Ireland in 1870 the Stock of Pigs showed a large increase over each of the three previous years. This description of live stock fluctuates in number very much, according to the prices of appropriate feeding stuffs.

Comparative results of Returns for Grazing and Corn districts of England.

The English Counties may be divided into Grazing and Corn districts of an acreage so nearly equal, that a Table has usually been compiled to show the chief results of the Agricultural Returns for such divisions of England, and the following Table is given for 1870. The Grazing, or Western division, includes (arranged from north to south) the counties of Northumberland, Cumberland, Durham, Westmoreland, York (North and West Ridings), Lancaster, Chester, Derby, Stafford, Leicester, Salop, Worcester, Hereford, Monmouth, Gloucester, Wilts, Dorset, Somerset, Devon, and Cornwall. The Corn growing, or Eastern division, includes (arranged from north to south) the counties of York (East Riding), Lincoln, Nottingham, Rutland, Huntingdon, Warwick, Northampton, Cambridge, Norfolk, Suffolk, Bedford, Bucks, Oxford, Berks, Hants, Hertford, Essex, Middlesex, Surrey, Kent, and Sussex.

After showing the total proportionate acreage in each of the divisions, the Table gives the acreage and per-centage proportions of the agricultural distribution of the land in each division; then the acreage under each Crop and under Grass in the two divisions respectively, and the Per-centage proportions of the

Acreage of the Crops and Grass in the Grazing and Corn counties to the total Acreage under each Crop and under Grass in England; and, lastly, the relative Number of each kind of Live Stock in the Grazing and Corn counties, and the Per-centage proportions of the Stock to the Total Number in England.

The following are the chief results indicated in the Table:— The Corn Crops occupy 24 per cent. of the acreage in the Grazing Counties, against 41 per cent. in the Corn Division. Permanent Pasture (not for Hay) in 1870 covered 38 per cent. of acreage in the Grazing Counties, against 21 per cent. in the Corn Counties. The acreage under Wheat and Barley, in proportion to the total for England, was 40 and 38 per cent. in the Grazing, against 60 and 62 per cent. in the Corn Counties. Potatoes were grown to the extent of 60 per cent. of the total Acreage of the Crop in England in the Grazing, against 40 per cent. in the Corn Counties. Permanent Pasture (not for Hay) in 1870 was in the proportion to the total of such pasture in England of 66 per cent. in the Grazing Counties and 34 per cent. in the Corn Counties.

The Horses returned as used solely for Agriculture were in nearly equal numbers in the two Divisions. But unbroken Horses and Mares for breeding were in the Grazing Counties in the proportion of 54½ per cent. of their total Number in England, and of 45½ per cent. in the Corn Division. Cattle were in the proportion of 66 per cent. in the Grazing and 33 per cent. in the Corn Divisions. Sheep and Pigs were both in nearly equal proportions in the two Divisions. The number and proportions for the Live Stock have reference only to the 25th of June, the date when the returns were made.

Questions and Answers relating to progress in practice of Agriculture in Great Britain.

With the view of obtaining some information that might assist in showing the progress taking place in the practice of Agriculture in Great Britain, a few questions were added to the instructions issued for the guidance of the collecting officers, which they were requested to answer to the best of their ability. The following abstract of the answers has been made, showing the number in the affirmative and negative under each question. Agriculturists who are well acquainted with the manner in which our farming is carried on may probably not attach much importance to these particulars, but they may be of some interest to persons with fewer opportunities of observation.

1.—Whether the Draining of Land is extending ?

	Number of Counties.	Number of Answers.		
		Done, or not required.	Yes.	No, or not much.
England - - -	42	6	25	11
Wales - - -	12	—	4	8
Scotland - - -	33	5	18	6

2.—Whether Hedges and Fences are being removed to enlarge Area of Fields ?

	Number of Counties.	Number of Answers.	
		Yes, in Parts of Counties.	No Change.
England - -	42	35	7
Wales - - -	12	4	8
Scotland - -	33	15	13

3.—Whether Steam Cultivation is in use ?

	Number of Counties.	Number of Answers.	
		Yes.	No.
England - -	42	19	14
Wales - - -	12	3	9
Scotland - -	33	5	24

4.—Whether the use of Machinery for Cutting the Crops and Preparing Corn for Market is increasing ?

	No. of Counties.	Number of Answers.			
		Cutting Crops.		Preparing Corn.	
		Yes.	No.	Yes.	No.
England - -	42	41	—	39	—
Wales - - -	12	11	—	—	12
Scotland - -	33	26	2	26	2

Following the Returns for Great Britain are Tables, with the latest information that has been received relating to the Agriculture of British Possessions and Foreign Countries. I wish that the tables could have been made to include particulars for a larger number of countries, but no more Colonial or Foreign Agricultural Statistics for recent years could be obtained.

Returns for British Possessions : Acreage under principal Crops.

Of the British Possessions, the Australian Colonies and Natal are the most alive to the usefulness of statistical records of agricultural resources, and carefully prepared statistics of agriculture are annually published by the governments of those Colonies. In the Australian Colonies, including Tasmania and New Zealand, there were in the year ended 31st March 1869, the latest for complete returns, about 1,586,000 acres under Corn Crops, of which about 1,117,000 acres were cultivated with Wheat. In all the Australian Colonies but New Zealand, the acreage of the Wheat crop is much in excess of that of any other Corn crop. Oats are rather largely grown in Victoria and New Zealand, and Maize in New South Wales. The cultivation of Cotton in Queensland has increased from 8,000 acres in 1867 to 14,000 acres in 1869. The planting of the Sugar Cane is extending in New South Wales and Queensland. Upon the continent of Australia, Vineyards occupied about 15,000 acres by the latest returns.

Average yield of Crops in Australia.

Tables are given of the total and average produce of the different kinds of Corn and of Potatoes in the Australian and South African Colonies. The yield of Wheat appears to have been good in Australia in the year to 31st March 1870, when it escaped the destructive ravages of the "Red Rust" blight. From 16 to 20 bushels per acre are about the average yield of a good Wheat harvest upon the continent of Australia, but in New Zealand it approaches to 28 bushels per acre.

Number of Live Stock in Australia, &c.

Live Stock, however, constitutes the chief agricultural wealth of the Australian and some other Colonies. According to returns, chiefly for the year ended 31st March 1870, there were in all the Australian Colonies (including Tasmania and New Zealand), 699,200 Horses, 4,059,500 Cattle, and 49,136,000 Sheep. The number of Sheep in Australia increases rapidly: in 1869–70 there were 1,536,000 more than in 1867–68, and as many as 5,465,000 more than in 1866–67. The Colony of Natal in the year 1869 had 20,000 Horses, 454,000 Cattle, and 333,000 Sheep. The Cape of Good Hope had in the year 1865 (no later return has been received), 227,000 Horses, 692,000 Cattle, and 9,836,000 Sheep.

Returns for Foreign Countries.

With respect to Foreign Countries, there are not many for which official agricultural returns of a late date have been published. I have been favoured with the most recent statistics by the chiefs of the Statistical Departments in countries where such information was available.

The Returns for Foreign Countries are arranged in a comparative form including corresponding particulars for the United Kingdom.

Acreage of Crops in France and United States.

The table of the Acreage of Crops shows that for Wheat there are in France about 17,400,000 acres, and in the United States about 19,200,000 acres against 3,770,000 in the United Kingdom. For Barley, France and the United Kingdom have nearly the same acreage, 2,700,000 and 2,623,000 acres, which are more than double that of the United States, 1,025,000 acres. For Oats, France has an acreage of about 8,200,000 acres, and the United States 9,500,000 acres, against 4,425,000 in the United Kingdom. For Rye, France has an acreage of 4,780,000 acres; the United States, 1,657,000; and the United Kingdom only 74,000 acres. Indian Corn or Maize is grown upon 1,653,000 acres in France, and upon as many as 37,000,000 acres in the United States. The Potatoe Crop comprises 3,066,000 acres in France, 1,222,000 acres in the United States, as compared with 1,639,000 acres in the United Kingdom. As regards other kinds of Agricultural productions which are of importance in the respective Countries, the Vineyards of France cover as many as 6,037,000 acres, and 337,000 acres are planted in France with Beetroot for sugar. In the United States there are 481,000 acres under Tobacco, 95,000 acres under the Sugar Cane, and 7,750,000 acres under the great staple article of Cotton.

Yield of Crops in France and United States.

By the Table of the quantities of the various Crops produced France is shown to have had in 1869, 296,800,000 bushels of Wheat

against 252,000,000 bushels in the United States. Maize is returned as yielding in 1869, 848,800,000 bushels in the United States; and for the same country in 1869 the Crop of Tobacco is put down at 273,775,000 lbs.; the Crop of Cotton at 3,155,000 bales, of an average weight of 450 lbs.; and Sugar at 124,000,000 lbs.

Average yield of Crops in France and United States.

The few comparative figures that can be given of the average yield, per English acre, of the principal Corn Crops abroad, exhibit some interesting results. A comparison of this kind should be made for a year of average yield in each Country, but although the dates vary for several of the Countries, and the character of the harvest is not specified, the variations of the yield are striking and in accordance with the generally admitted scale of productiveness in the respective Countries. Some Agriculturists may, perhaps, be surprised at the averages for France, which show about 17 bushels per acre for Wheat, 21 bushels for Barley, 25½ for Oats, and 15 for Rye. The average yield of Wheat in the United States is stated at 13¼ bushels per acre.

Live Stock in Foreign Countries.

The Table relating to Live Stock shows the number of Horses, Cows, and other Cattle, Sheep, and Pigs in various Countries. With reference to the United States, it may be observed that a much larger number of Cattle is returned than was given in the corresponding Table last year. The only explanation that can be offered of the discrepancy is that a large portion of the cattle must have been omitted from the return last year.

It is to be regretted that it is not practicable at present to prepare more complete tables to exhibit the relative agricultural resources of various Countries. The inter-dependence of many nations for more or less constant supplies of the chief articles of food, makes the subject of good comparative statistics of agriculture one of almost universal interest and importance.

I have the honour to be,

My Lords,

Your Lordships' most obedient Servant,

A. W. FONBLANQUE.

Statistical Department, Board of Trade,
Whitehall, February 1871.

AGRICULTURAL STATISTICS, IRELAND, 1869.

TO HIS EXCELLENCY JOHN POYNTZ, EARL SPENCER, K G.,

&c., &c., &c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,

I had the honour to submit on the 12th of August, a Return of the acreage under Flax in 1868 and 1869, and the number of Scutching Mills in 1868, by Counties and Provinces. I now beg to submit to your Excellency General Abstracts showing for the same years the area under each description of Crop, and the number of Horses, Cattle, Sheep, and Pigs, by Counties and Provinces, and for all Ireland.

The Emigration from Ireland for the first *seven* months of 1868 and 1869 is also given.

The collection of the Agricultural Statistics was carried out this year as heretofore by about 4,000 Enumerators, selected from the Royal Irish Constabulary and Metropolitan Police Force, and they have furnished Returns of Tillage and Live Stock on nearly 600,000 separate holdings. The inquiries were, as usual, efficiently conducted by the officers and men employed on this duty, which extended over a period of six weeks from its commencement on the 1st of June.

The Abstracts are compiled from the summaries of the several districts as made up by the Enumerators, and may differ slightly from the *revised* figures hereafter to be published; but I do not anticipate that any important change will be required.

Extent under Crops.

The total area under all Crops in 1869 is	5,575,843 acres.	
The do. do. do. in 1868 was (*revised numbers*)	5,547,971 „	
Showing an increase in the extent under Crops in 1869 of . .	27,872 „	

The Crops which *increased* in extent this year are—

Increase in Cereal and Green Crops.

		Increase. Acres.	Acres.
CEREALS,	Barley, ...	34,591	35,884
	Bere and Rye, ...	1,293	
GREEN CROPS,	Potatoes, ...	7,156	13,315
	Turnips, ...	1,786	
	Mangel and Beet Root, . . .	2,018	
	Vetches and Rape, . . .	2,355	
Flax, ...			22,695
Total Increase on the foregoing Crops, .			71,894

Decrease in Cereal and Green Crops.

The Crops which *diminished* in extent in 1869 are—

		Decrease. Acres.	Acres.
Cereals,	Wheat,	4,033	20,893
	Oats,	16,857	
	Beans and Peas,	3	
Green Crops,	Cabbage,	736	794
	Carrots, Parsnips, and other Green Crops,	58	
Meadow and Clover,			22,335
Total Decrease on the foregoing Crops,			44,022
Making a *Net* Increase in the area under all Crops of			27,872

Cereal Crops

Green Crops

Flax.

From the foregoing summaries it will be seen that wheat decreased by 4,033 acres, oats by 16,857 acres, and beans and pease by 3 acres. Barley increased by 34,591 acres, and bere and rye by 1,293 acres. Potatoes increased by 7,156 acres, turnips by 1,786, mangel and beet root by 2,018, and vetches and rape by 2,355 acres. Cabbage decreased by 736 acres, carrots, parsnips, and other green crops by 58 acres, and meadow and clover by 22,335 acres. Flax increased by 22,695 acres.

ABSTRACT OF CEREAL CROPS.

	1868. Acres.	1869. Acres.	Increase in 1869. Acres.	Decrease in 1869. Acres.
Wheat,	285,150	281,117	—	4,033

Returns of Live Stock.

Live Stock.

It appears from the following Table that the Returns of Live Stock for 1869 when compared with 1868 show an increase in the number of Horses of 2,545; of Cattle 80,998; and of Pigs 210,215. Sheep exhibit a decrease of 253,338.

Number of Live Stock.

The following are the numbers of Live Stock for each year from 1855 to 1869, inclusive:—

Years.	Number of Horses.	Number of Cattle.	Number of Sheep.	Number of Pigs.
1855,	556,287	3,564,400	3,602,342	1,177,605
1856,	573,408	3,587,858	3,694,294	918,525
1857,	599,782	3,620,954	3,452,252	1,255,186
1858,	611,321	3,667,304	3,494,993	1,409,883
1859,	629,075	3,815,598	3,592,804	1,265,751
1860,	619,811	3,606,374	3,542,080	1,271,072
1861,	614,232	3,471,688	3,556,050	1,102,042
1862,	602,894	3,254,890	3,456,132	1,154,324
1863,	579,978	3,144,231	3,308,204	1,067,458
1864,	562,158	3,262,294	3,366,941	1,058,480
1865,	548,339	3,497,548	3,694,356	1,305,953
1866,	535,799	3,746,157	4,274,282	1,497,274
1867,	524,180	3,707,803	4,835,519	1,235,191
1868,	524,703	3,646,796	4,901,496	869,578
1869,	527,248	3,727,794	4,648,158	1,079,793
Difference in Numbers between 1868 and 1869,	Increase. 2,545	Increase. 80,998	Decrease. 253,338	Increase. 210,215

Value of Live Stock.

The *total estimated* value of Horses, Cattle, Sheep, and Pigs this year, is £34,911,360 being an increase of £530,944 compared with 1868, as appears by the following Table:—

ESTIMATED VALUE of LIVE STOCK in IRELAND in each Year from 1855 to 1869, calculated *according to the rates assumed by the Census Commissioners of* 1841, viz.:—For Horses, £8 each; Cattle, £6 10*s.*; Sheep, 22*s.*; and Pigs, 25*s.* each. [*These rates have been retained since* 1841, *in order to facilitate a comparison of the value—one year with another. A per-centage may be added on account of the increased value of stock since that period.*]

Years.	Horses.	Cattle.	Sheep.	Pigs.	Total Value.
	£	£	£	£	£
1855,	4,450,296	23,168,600	3,962,576	1,472,006	33,053,478

Difference in Value between 1868 and 1869,	Increase. £20,360	Increase. £526,487	Decrease. £278,672	Increase. £262,769	Increase. £530,944

Scutching Mills.—The number of Mills for scutching Flax in each Province in 1868, was in Ulster, 1,420; Leinster, 47; Munster, 41; Connaught, 34; making in all 1,542. Scutching Mills.

Emigration.—In the first *seven* months of 1869 the Returns of Emigrants from the several ports of Ireland show that 45,246 persons left this country. In 1868, the number for the same period was 42,607, being in this year an increase of 2,639 persons. The Emigration referred to is given by provinces for 1868 and 1869 at page 20. Emigration.

Weeds.—On several occasions I have ventured to call attention to the great injury arising from the unchecked growth of weeds which is, unhappily, so apparent throughout the country. On this subject the late Sir John Sinclair has given the following experiments which prove the almost incredible advantage of carefully weeding cereal crops:— Weeds.

1. "Seven acres of light gravelly land were fallowed, and sown broadcast with wheat; one acre was measured off, and not a weed was pulled out of it; the other six were carefully weeded. The unweeded acre produced 18 bushels; the six weeded acres 135 bushels, or 22½ per acre, which is 4½ bushels, or ¼ more produce in favour of weeding.—2. A six-acre field was sown with barley, in fine tilth, and well manured. The weeding, owing to a great abundance of charlock, cost 12*s.* per acre. The produce of an unweeded acre was only 13 bushels; of the weeded, 28. Difference in favour of weeding, 15 bushels per acre, besides the land being so much cleaner for succeeding crops.—3. Six acres sown with oats; one acre ploughed but once, and unmanured, produced only 17 bushels. Another six acres ploughed three times, manured, and weeded, produced 37 bushels. This experiment proves that oats require good management, and will pay for it as well as other crops. Ten bushels of the increased produce may be fairly attributed to the weeding, and the other ten to the manure."

Labourer's Dwellings.—It is scarcely possible to exaggerate the importance of improving the dwellings of the labouring classes; the Legislature has wisely enabled the Treasury to grant loans for this most desirable object through the medium of the Board of Public Works. According to the census of 1861, the number of *fourth-class houses* in Ireland, each of which had but *one room for the entire family*, was 89,374—and in these were living nearly *half a million* of persons. Labourers' Dwellings.

I have again the pleasure of stating that, with a very few exceptions, the particulars given in these Abstracts have been readily afforded to the Enumerators, and I beg to repeat my respectful acknowledgments for a continuance of the valuable assistance which I have now for so many years experienced in connexion with these important Statistics.

I have the honour to be

Your Excellency's very faithful servant,

WILLIAM DONNELLY,

Registrar-General.

General Register Office, Dublin,
1*st September*, 1869.
